Introduction to the NRPC

The National Regional Planning Council (NRPC) is a collaborative network established to support public safety communications across the United States. The NRPC was started to support and coordinate the work of Regional Planning Committees (RPCs), particularly in the field of public safety communications. Its creation was driven by the need for better organization, efficiency, and interoperability in how public safety agencies use radio frequency spectrum, primarily in the 700 MHz and 800 MHz bands.

Mission and Functions

The NRPC's mission is to serve all public safety communications users through planning and management for their spectrum needs. Its key functions include:

- **Assisting Regional Planning Committees (RPCs):** Providing support to improve spectrum efficiency and promote interoperability.
- **Education and Training:** Offering workshops and materials to help RPCs develop and operate their plans effectively.
- **Facilitating Collaboration:** Organizing forums for RPCs to share information, collaborate, and allocate resources.
- **Research and Information Sharing:** Conducting research and providing critical information to support RPC success.
- **Advocacy:** Engaging with elected and appointed officials to promote RPC representation on issues benefiting public safety interests.

The NRPC also oversees the CAPRAD Oversight Committee, which manages the CAPRAD system—a tool for coordinating spectrum planning and allocation across regions.

Structure and Governance

The NRPC is a national community consisting of FCC-authorized Regional Planning Committees (RPCs), each affiliated with a state or U.S. territory. These RPCs are composed of local government representatives and public safety officials who collaborate on regional spectrum planning and management.

Basic Process for RPCs selecting a new Chairperson, Vice Chair, Secretary and Treasurer.

Each RPC must follow the guidelines of their bylaws. The information provided here are general guidelines many regions follow. Not all regions assign a secretary and/or treasurer.

Committee Member Selection Process

1. **Nomination:** Members of the committee nominate candidates for the Chairperson or applicable position.
2. **Eligibility:** Nominees are typically required to be active members in good standing, often with experience in public safety communications.
3. **Voting:** An election is conducted among the committee members. Voting methods can include secret ballots or open votes, depending on the committee's established procedures.
4. **Term:** The elected Chairperson serves a term as defined by the committee's bylaws, commonly one or two years, with the possibility of re-election.
5. **Transition:** Upon election, the new Chairperson assumes responsibilities, which may include notifying relevant agencies, such as the FCC, about the leadership change.

CAPRAD

The **Computer Assisted Pre-Coordination Resource and Database (CAPRAD)** system is a centralized platform designed to streamline the coordination and application process for 700 MHz and 800 MHz public safety spectrum licensing. It facilitates collaboration among RPCs, frequency coordinators, and public safety agencies to ensure efficient spectrum management. This system holds all the tools and planning documentation required by the RPCs.

When a new member is added to a region regardless of the position and they need access to CAPRAD, the current Chairperson must email CAPRAD Support to request access. The email address is support@caprad.org. She will need a Name, Email address and what role the member will hold in CAPRAD. **DO NOT** have a new member go to CAPRAD to try to set up their own account. They will just create a public account without access to any of the Region's applications.

CAPRAD has two platforms www.capradap.org where the applications are submitted and reviewed. www.caprad.org where the RPCs keep all their documentation and tools for coordinating applications. We will review the application module first then the planning side.

CAPRAD Application Module

Log In

This is the main login page. Do not register for a new account if you need access for RPC use.

If you are new to the Region and need access to CAPRAD to review applications submitted to your region, have the Chairperson email support@capradap.org or click CAPRAD Application support on the login page. for access. Do not register for an account from this page, that will only give you a public account where you can create applications.

Once you have your login credentials and enter the system it will open to the Home page (My Apps). This page allows you to see what applications are waiting for your region to review.

1. This area will tell you what role you are logged in as. If you have a public and RPC account, you will know which one you are logged into. For public accounts it will say Public 601 user. For RPC accounts it will list your role in the system.
2. Page manager, you will only have two tabs under this section. My Account and Tools. Applications are listed on the My Account page, shown in the image. The tools page has a list of tools available to RPC members. You can look applications up on the tools page if you don't see them on any of the application pages.
3. This bar changes depending on if you are on the My Account or Tools page. The one shown above is for My Account.
 - a. My Apps - this is the page that appears when you first login. It lists your applications in New, Initial Review and Data Entry.
 - b. My Reports- there are 3 reports you can run for applications.
 - c. My history – this will list applications you have recently worked on.
 - d. Account Management – this is where you can change your password.
4. If you are involved with multiple regions, you can change which regions applications you are looking at under this user section.
5. This will show the last three applications you worked on.
6. These are different pages where you can find applications based on the status they are in.

New Apps	In Process	Holding	Adjacent Region Review	Completed	Unassigned
Quick Link: New Data Entry Initial Review					

New Apps has three statuses displayed

1. New applications – When an application is submitted to the RPC
2. Data Entry – these are applications you as an RPC Member have entered into the system
3. Initial Review – After the RPC Chairperson opens a new application the status should be changed to Initial Review. While the application is in Initial Review the application is checked to see if all needed information has been provided. If more information is needed the application can be sent back to the application for completion, or be moved to In Progress

New Apps	In Process	Holding	Adjacent Region Review	Completed	Unassigned
Quick Link: RPC Review In Progress Approved Withdrawn					

In Process has three statuses displayed

1. RPC Review In Progress – After the Initial Review is complete and the RPC deems the application ready to move forward the application is moved to In Progress. In Progress is where the RPC Members can do a full review of the application, attach documentation, do a check app..... From In Progress you can move the application to one of three statuses; Application Info, Approved or Adjacent Region Review. Approved – applications in this status have been approved by the home RPC and the adjacent regions.
2. Withdrawn – Withdrawn is only available from approved. If an applicant decides not to move forward with the application it should be placed in Withdrawn.

New Apps	In Process	Holding	Adjacent Region Review	Completed	Unassigned
Quick Link: Application Info Return to Applicant					

Holding has two statuses displayed

1. Application Info – Application Info is used when you have reviewed the application and need more information from the applicant. After you have received the information requested you would put the application back into In Progress.
2. Return to Applicant – This status is used when the application is missing information or need major corrections. An email should be sent to the applicant with the needed information. Add that email to the notes of the application.

New Apps	In Process	Holding	Adjacent Region Review	Completed	Unassigned
Quick Link: Review Approval					

Adjacent Region Review has two statuses displayed

1. Review – Applications in this status are being reviewed by the adjacent regions.

2. Approval – Applications in this status have been approved by the adjacent regions.

New Apps	In Process	Holding	Adjacent Region Review	Completed	Unassigned
Quick Link: Submitted to Coordinator					

Completed has one status displayed

1. Submitted to Coordinator – This status is used when the application is approved and ready to be submitted to the selected Public Safety Coordinator.

New Apps	In Process	Holding	Adjacent Region Review	Completed	Unassigned
Quick Link: Unassigned					

Unassigned is used for an application that may have come in without a region assigned. This shouldn't happen often since the application is assigned to a region before it is submitted.

This page has several useful tools to use when reviewing an application.

CAPRAD Application Tools – If your region requires an RPC member to enter the applications into CAPRAD then you would go here to start the application. There are two options for creating an application.

1. Create Form 601 for 700/800 NPSPAC – this is used for new applications
2. Create application based on Call Sign for 700/800 NPSPAC- this is used if you want to modify an existing license/call sign.

Applications Search - is used to find an application based on the application id number. If you have the app id but can't remember what status it is in you would use this tool. If a preparer/applicant is requesting an update on an application and only provides the app id, you could look it up with this tool.

There is also a full search option – you can look an application up by entity name, app id, state, call sign. You can search for current or old applications.

Frequency Tools – has a link to the ULS, you can look up a call sign to verify information. You can also do a frequency search based on coordinates.

Help – There are several links to help you navigate the system as well as videos showing basic functions.

Conversion Tools – there are three conversion tools available

1. Coordinate Conversion – convert coordinates from NAD 27 to NAD 83 or vice versa.
2. Distance Conversion – convert feet and miles into meters and kilometers.
3. Power Conversion – converts power, field strength and voltage

Calculators – There are numerous calculators available

1. Max ERP – This tool is used more for UHF and VHF safe harbor.
2. HAAT – Height Above Average Terrain
3. DHAAT – Directional Height Above Average Terrain
4. Short Spacing – This is used for 800 MHz to reveal if an incumbent is too close to reuse the frequency.
5. Distance – Calculate the distance between two sites.
6. Elevation – You can find the elevation of a site by entering the coordinates.
7. Distance and Bearing – This will tell you the distance between two sites.
8. Bounding Coordinates – Radius and Center Point to Bounding Points.

GIS Tools – There are numerous map/coordinate-based tools available

1. Find coordinates for address
2. Find Closest Town – find the closest town to your coordinates
3. Find Coordinate – find center coordinates for a city
4. Show Map Based on Coordinates
5. Terrain Path Profile
6. Low Power Contours - not used in 700/800 MHz
7. Service Contours
8. Borders and Zones – find out if you are in a Canadian/Mexican region or the quiet zone.

FCC Form 601

When you log into the system, it will open to the My Apps page. To open an application, click on the id number (blue hyperlink).

Form 601 - Main Page 1

TCAP21111111006650 - CITY OF WICHITA FIRE DEPARTMENT

1) Radio Service Code: **SG** 1b) Existing Radio Service Code: **N/A**

General Information

2) Purpose: **NE - New**

3a) If this application is for a Developmental License, Demonstration License, or a Special Temporary Authorization (STA), enter the code and attach the required exhibit as described in the instructions. Otherwise enter 'N' (Not Applicable).

3b) If this application is for Special Temporary Authority due to an emergency situation, enter 'Y'; otherwise enter 'N'. Refer to Rule 1.915 for an explanation of situations considered to be an emergency. (NOTE: If not a STA, answer N/A.)

4) If this application is for an Amendment or Withdrawal, enter the file number of the pending application currently on file with the FCC.

5) If this application is for a Modification, Renewal Only, Renewal/Modification, Cancellation of License, Duplicate Licensee, or Administrative Update, enter the call sign of the existing FCC license. If this is a request for Registered Location/Link, enter the FCC call sign assigned to the geographic license.

6a) If this application is for a New, Amendment, Renewal Only, or Renewal/Modification, enter the requested authorization expiration date (this item is optional).

6b) If this application is for a Renewal Only or Renewal/Modification and the license is a geographic area license, is the license used to provide service to customers (C), or is the license used for private business (internal) purposes or to meet the licensee's public interest/public safety communications needs (P)?

7) Is this application "major" as defined in §1.929 of the Commission's Rules when read in conjunction with the applicable radio service rules found in Parts 22 and 90 of the Commissions Rules? (NOTE: This question only applies to certain site-specific applications. See the instructions for applicability and full text of §1.929.)

8) Are attachments being filed with this application?

Fees, Waivers, and Exemptions

9) Is the applicant exempt from FCC application fees?

10) Is the applicant exempt from FCC regulatory fees?

11a) Does this application include a request for a Waiver of the Commission's rule(s)? If 'Yes', attach an exhibit providing rule number(s) and explaining circumstances.

11b) If 11a is 'Y', enter the number of rule section(s) being waived.

12) Are the frequencies or parameters requested in this filing covered by grandfathered privileges, previously approved by waiver, or functionally integrated with an existing station?

Icon Legend: View, Edit, AutoX. Form Field Legend: Required Form Field, Optional Form Field, Not Required Form Field. Legend: FCC Information From FCC License, Modified License Info, Pending Information From Pending Database.

Main page 1 has information about the Radio Service Code, license type and call sign

1) Radio Service Code: **SY**

The radio service code are:

1. SY, SG or SL for 700 MHz
2. YE, GE for 800 MHz. You may also see YP or GP for older applications.

2) Purpose: **NE - New**

The purpose will be either New or Modification, there are other options, but they are not used often.

Lines 3a) and 3b) indicate if this is for an STA or permanent licensing.

Lines 4 and 5 are only used for amendments.

Line 6 will list a call sign if the application is for a modification.

Line 7 will be Yes for a modification and N/A for a new license request.

Line 8 should be Yes since you will have an RPC approval letter to attach.

Lines 9 and 10 will be Yes

Lines 11a) and 11b) are Yes if they are requesting a waiver.

Line 12 is Yes if they are grandfathering something on the license.

You can move through the application by using the links on the left-hand side.

The screenshot shows a sidebar menu with the following items:

- Technical Overview
- Spectrum request
- Main Page 1
- Main Page 2
- Main Page 3
- Schedule H
- Adjacent Region
- Application Region
- Locations (2)
 - Loc 1 (A) (1)
 - Loc 2 (A) (1)

Below the menu, there are links for "User Guide [Html] | [PDF]" and a "Table View" section with links for "Antennas (2)", "Frequencies (6)", and "Emissions (12)".

Under "Bulk Tasks", there are links for "Bulk Add Frequency" and "Bulk Emission Tasks".

Under "Check", there is a link for "Check App Integrity".

A section for "New Application" shows the date and time "12/13/2021 9:12:06 AM".

At the bottom, there is a "Tools" section with links for "Attachment (1)", "Notes (3)", "Print View", "Check App", "Status", and "Send Email".

50) Has the applicant or any party to this application, or any party directly or indirectly controlling the applicant, ever been convicted of a felony by any state or federal court?		
		<input type="radio"/> Yes <input checked="" type="radio"/> No
51) Has any court finally adjudged the applicant or any party directly or indirectly controlling the applicant guilty of unlawfully monopolizing or attempting unlawfully to monopolize radio communication, directly or indirectly, through control of manufacture or sale of radio apparatus, exclusive traffic arrangement, or any other means or unfair methods of competition?		
		<input type="radio"/> Yes <input checked="" type="radio"/> No
Basic Qualification Questions		
49) Has the applicant or any party to this application or amendment had any FCC station authorization, license, or construction permit revoked or had any application for an initial, modification, or renewal of FCC station authorization, license, or construction permit denied by the Commission?		
		<input type="radio"/> Yes <input checked="" type="radio"/> No
50) Has the applicant or any party to this application, or any party directly or indirectly controlling the applicant, ever been convicted of a felony by any state or federal court?		
		<input type="radio"/> Yes <input checked="" type="radio"/> No
51) Has any court finally adjudged the applicant or any party directly or indirectly controlling the applicant guilty of unlawfully monopolizing or attempting unlawfully to monopolize radio communication, directly or indirectly, through control of manufacture or sale of radio apparatus, exclusive traffic arrangement, or any other means or unfair methods of competition?		
		<input type="radio"/> Yes <input checked="" type="radio"/> No
For Renewal or Renewal/Modification Applicants		
57) Operation/Performance Requirement Certification		
Select License Type		N/A
57) (For a site-based license): Applicant certifies that it is continuing to operate consistent with its most recently filed construction notification (or most recent authorization, if no construction notification was required).		
		<input type="radio"/> Yes <input type="radio"/> No <input checked="" type="radio"/> N/A
58) Discontinuance of Service Certification [same for all] - Applicant certifies that no permanent discontinuance of service or operation, as applicable, occurred during its current license term.		
		<input type="radio"/> Yes <input type="radio"/> No <input checked="" type="radio"/> N/A
Note: If the response to either Item 57 or Item 58 is "Y", attach an exhibit that demonstrates that over the course of the license term, the Applicant provided and continues to provide service to the public, or operated and continues to operate the license to meet the Applicant's private business or public interest/public safety communications needs. This exhibit must include a detailed description of the Applicant's provision of service or, when allowed under the relevant service rules or pursuant to waiver, use of the spectrum for private business or public interest/public safety communications needs, during the entire license period and address, as applicable: (1) the level and quality of service provided by the applicant (e.g., the population served, the area served, the number of subscribers, the services offered); (2) the date service commenced, whether service was ever interrupted, and the duration of any interruption or outage; (3) the extent to which service is provided to rural areas; (4) the extent to which service is provided to qualifying tribal land as defined in 47 CFR § 1.2110(e)(3)(i); and (5) any other factors associated with the level of service to the public. The licensee may note in its exhibit: 1) any grant(s) of waiver or extension of a performance deadline or license renewal subject to meeting a performance requirement; or 2) if the final performance deadline and/or expiration date for the license accelerated because the licensee did not meet an interim performance requirement.		
59) Regulatory Compliance Certification [same for all] Applicant certifies that it has substantially complied with all applicable FCC rules, policies, and the Communications Act of 1934, as amended.		
		<input type="radio"/> Yes <input type="radio"/> No <input checked="" type="radio"/> N/A
Note: If the response to Item 59 is "Y", attach an exhibit explaining the circumstances and demonstrating why Applicant's license should be renewed.		
General Certification Statements (Click To See)		
Signature		
60) Typed Or Printed Name of Party Authorized To Sign		
First Name: NICHOLAS	MI:	Last Name: WOODS
61) Title: CAPTAIN		Suffix:
Signature <input checked="" type="checkbox"/> Click this box if you are the individual above and you agree to the terms above.		
FAILURE TO SIGN THIS APPLICATION MAY RESULT IN DISMISSAL OF THE APPLICATION AND FORFEITURE OF ANY FEES PAID. Upon grant of this license application, the licensee may be subject to certain construction or coverage requirement. Failure to meet the construction or coverage requirements will result in termination of the license. Consult appropriate FCC regulations to determine the construction or coverage requirements that apply to the type of license requested in this application. WILLFUL FALSE STATEMENTS MADE ON THIS FORM OR ANY ATTACHMENT ARE PUNISHABLE BY FINE AND/OR IMPRISONMENT (U.S. Code, Title 18, §1001) AND/OR REVOCATION OF ANY STATION LICENSE OR CONSTRUCTION PERMIT (U.S. Code, Title 47, §312(a)(1)), AND/OR FORFEITURE (U.S. Code, Title 47, §503).		

Main Page 3 has regulatory information.

Line 41 will always be Private, Internal Communication

Line 42 will always be Mobile

Lines 43 – 51 will be No or N/A

Lines 56 – 57 are for the name and signature of the person at the entity that approved the application.

Schedule H

Schedule H has all the eligibility information

The screenshot shows a web-based form for a radio license application. The title bar reads "TCAP2111111006650 - CITY OF WICHITA FIRE DEPARTMENT". The form is divided into several sections, with seven specific areas highlighted by blue boxes and numbered 1 through 7:

- 1**: "1) Rule Section:" dropdown menu.
- 2**: "2) Describe Activity:" text input field.
- 3**: "3) FC Number:" dropdown menu (value: TCAP2111111006650), "4) Frequency Coordinator:" dropdown menu (value: MSA), "5) Phone Number:" dropdown menu (value: 999-999-9999), and "6) Coord Date:" dropdown menu.
- 4**: "7) Has this application been successfully coordinated:" radio buttons (Yes, No).
- 5**: "9) Associated Call Signs (Check to Delete)" section with a list of call signs and checkboxes.
- 6**: "10) Facility Id of Parent Station:" dropdown menu (value: 0), "11) Parent Radio Service:" dropdown menu (value: N/A), and "12) City and State of Parent Stations Principle Community:" dropdown menu.
- 7**: "Control Point(s) (Other than at the transmitter)" table with columns for "15) Action", "16) Control Point #", "17) Location (Street Address, City/Town, State, County/Borough/Parish)", and "18) Phone Number". The table contains one entry with "Add" as the action, "1" as the control point number, and "455 N MAIN WICHITA KS - Kansas SEDGWICK" as the location.

1. Rule Section – 700 MHz 90.523. 800 MHz 90.613-619
2. The FCC likes a brief description of what the radios are used for.
3. This is filled out by the Frequency Coordinator
4. Question 7 is answered by the Frequency Coordinator. 8 is only answered yes if the applicant is requesting slow growth.
5. If associated call signs need to be added, this is where they go.
6. This is not for public safety applicants.
7. The FCC requires at least one control point. This is where a copy of the license is kept for the agency.

Add Adjacent Region(s)

When a location(s) on an application is within 113 km (70 m) from another region it must be sent to that region(s) for review. This page will pop up when you change the status of the application to Adjacent Region Review. When this page opens all your adjacent regions will be checked, uncheck any regions that do not need to review the application before clicking Add Adjacent Regions. Your application will not be sent to any region without clicking the Add Adjacent Regions button. If you forget to click the add Adjacent Regions when you change the status you can go back to the Adjacent Regions page to send them. This is the page where they approve or deny the application. If they deny the application, they will also include a note with their reasoning.

Application Region

The application region will list what region the application is in, if for some reason you receive an application that should be in another region you can change it to the correct region on this page.

Antennas

You can modify or add antennas information on this page.

- Advantages of Table View Antennas
- Combines easy data entry and advanced SpectrumWatch data overlay and color-coding technology
 - Data overlay: View both antennas on the application and the FCC license, when specified
 - Reduce errors by selecting only existing location numbers from drop down lists
 - Easier modifications: For an existing antenna from the license (row in light blue), change the action to "Mod" then change the appropriate fields. Changes will be marked in light green.
 - Color-coding: See the legend below for all the color-coding descriptions>
 - Filter frequencies by location and antenna for easier viewing

AutoX

AutoX is CAPRADs frequency search used to see any co or adjacent channel incumbents on a specific frequency. To use this feature, click on the AutoX button on the frequency line you want to review. The search will run based on the coordinates and frequency(s) on the application. The search pulls in all call signs at the FCC and any applications in CAPRAD.

AutoX Input
Frequency Information
 Lo: MHz
 Hi: MHz

1

Emission Bandwidth: kHz
(This is the bandwidth of the signal you are trying to license. It will select channels that can support this bandwidth.)

Coordinates (NAD83)
 Enter your search center point. (Decimal Degree or Degree-Minute-Seconds)
(Remember that W should be used for Longitude in the United States)
 Latitude: - [Enter as decimal](#)
 Longitude: -

2

☐ Show Adjacent Channels
☐ <= 6.25 kHz
☐ <= 12.5 kHz
☒ <= 25 kHz

4

Search Distance
 Enter the number of kilometers you want to search from your entered coordinate.
 Co-channel Distance: km
 Adj-Channel Distance: km

3

Freq Class Type: ☐ General Use ☐ I/O Low Speed Data ☐ State License
☐ Air-to-Ground ☐ General Use (D) ☐ Interoperability
☐ Low Power ☐ I/O Nationwide Call ☐ Unusable
☐ General Use (R)
(Frequency Class Type filter consider only for 700 Band Frequencies (Low Freq < 805))

5

1. This is the frequency that is being analyzed.
2. These are the coordinates the search is based on.
3. This is the distance the search will look for users.
4. You can choose if you want to see 6.25 KHz, 12.5 KHz, or 25 KHz adjacent channel users.
5. This box is used if you are doing a frequency search to find a frequency. Since most applications are required to have frequencies when submitted you will not use this often.

Once you have everything set on the above page, click Start Search to see the results.

Roles and Responsibilities

Data Entry – RPC Members change to this role when they are entering an application for an applicant/preparer.

RPC Chair – Region Chair has overall authority for Region Role Assignment and final approval of all applications.

RPC Reviewer – RPC Review assigned by the Chair to review, comment and attach documents on all applications under review by the region.

Tech Reviewer – Tech Review assigned by the Chair to review, comment and attach documents on all applications under review by the region.

RPC Member – Region Member assigned by the Chair to view all applications under review by the region comments would be sent to the Chair for action.

Adjacent Region Chair – Adjacent Region Chair has access to approve or deny and Adjacent Region application, add attachment and notes.

Adjacent Region Member – Adjacent Region Member can review applications in Adjacent Region status.

CAPRAD Planning Module

CAPRAD Planning has a lot of useful tools for RPCs to use when coordinating requests for 700/800 MHz NPSPAC applications. In addition, it is also a place for RPCs to keep important information. This document will go over some of the tools available to the RPCs and their members.

Public users do not need to login to access CAPRAD but are limited in what they can see. RPC users can log in with their credentials for CAPRAD application module to gain access to all tools and information available for their region(s). Once you login as an RPC user you will be directed to the main page.

PUBLIC INFORMATION

RESOURCE LINKS

All Application Processing has been transferred to the new CAPRAD Application Module

To submit a 700 or 800 MHz application, click here:

[SpectrumWatch-CAPRAD](#)

Note that you must have a SpectrumWatch account to create applications:

[CAPRAD Application Manual for public users](#)

All Application Data in CAPRAD has been moved to the SpectrumWatch-CAPRAD Application System

Note that the 700/800 MHz Planning Modules will remain in CAPRAD

If you have questions regarding Planning contact CAPRAD Support

700 MHz Frequency Database Module

The 700MHz spectrum model has been updated to reflect the frequency changes as a result of rebanding. A new General Use channel pack has been loaded for all 55 regions and is available for use.

An additional pack has been done for State Channels and it is loaded as well.

If channel allotments have been created offline they can be loaded using an MS Excel file by sending the file to the [CAPRAD Administrator](#). The acceptable Excel file formats are defined in the Template document below:

MS Excel channel 700 MHz Allotments template: [700 MHz Template](#)

800 MHz Frequency Database Module

The 800MHz spectrum model has been updated to reflect the frequency changes as a result of rebanding. The system is now available for regional planners to enter their channel use information.

If channel use information has been created offline it can be loaded using an MS Excel file by sending the file to the [CAPRAD Administrator](#). The acceptable Excel file formats are defined in the Template document below:

MS Excel channel 800 MHz Assignments template: [800 MHz Template](#)

CAPRAD News

CAPRAD News

There is a box on the right side labeled CAPRAD News, if there is anything going on with the system or upcoming meetings they will be noted in that box. On the left side of the page is a directory for each spectrum and additional information. If you click the drop-down arrow on any of the sections, more options will show up. We will go over each of those pages in this document.

4. You can create a new directory/folder.
5. This is where you can upload new documents.
6. You can edit or delete a document here.

Mapping:

The mapping page has several options that allow you to see where sites are located in your region.

Map Layers:

Most of these layer options are self-explanatory, if you want to see water ways, railroads.... Check the boxes next to the desired layer. The items that are highlighted and numbered above are the most used.

Reset Map: (1) At the top of the Map Layers box is the zoom and map reset options. As you zoom in you will need to recenter the map. To do that you click on the area of the map that you want it to be centered on, as an example if you want to center on your state click close to the state name. As you zoom in you will need to recenter as you go.

Water Features: This layer adds rivers, lakes and other major water ways in your region.

Federal Land: This layer adds any known military bases, Indian reservations and other federal lands.

Cities: This layer adds city names to each state.

Major Roads: This layer adds highways, county and state roads.

Airports: This layer adds any municipal airports in the state.

Antenna Sites: (2) This layer is one of the most commonly used layer within the regions. This layer allows you to see any licensed sites on a frequency within your region. We will go over this function in more detail.

Regions: (3) This is another commonly used layer. This layer allows you to see what county a frequency is used within your region. We will go over this function in more detail.

Regions (Outline): This layer adds the region borders throughout the Country.

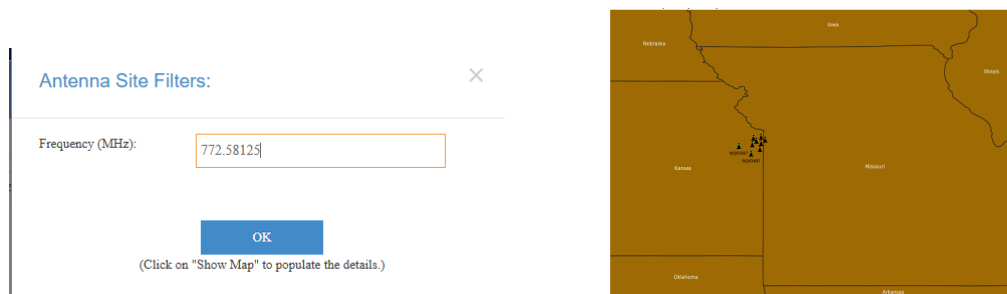

State Boundaries: This layer is automatically selected; it shows the state borders.

Band: (4) You can choose 700 or 800 MHz depending on what band you are looking at.

Show Map: (5) Once you have selected your layers click show map

Antenna Selection

To see where licensed sites on a specific frequency/channel in your region are licensed, select the antenna sites layer. You will need to check the box next to Antenna Sites, in addition you will also need to click on the blue antenna icon . A box will pop up asking for the desired frequency. Enter the frequency and click ok, then click on Show Map. When the map populates it will show the entire country. You can center the map by clicking what area you are interested in and then use the zoom buttons to get a closer view.

If there are any fixed sites licensed on the frequency, little black antennas will show up indicating where they are located.

To see where a frequency/channel is allotted within your region, select the Regions layer. You will need to check the box next to regions, in addition you will also need to click the blue antenna icon  **Regions**  A box will pop up where you can choose from three options to get the information you need. Enter the information and click ok, then click Show Map

Region Filters: ✕

☒ By Channel Number & its sub level channels match

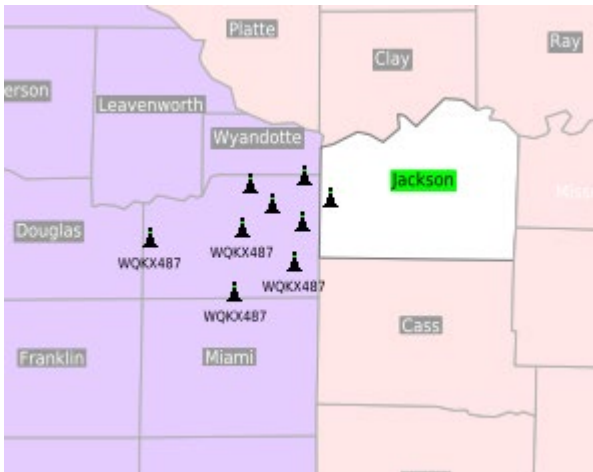

☐ By exact Frequency (MHz) match

☐ By Frequency (MHz) in respective Bandwidth (Only for 700 Mhz)

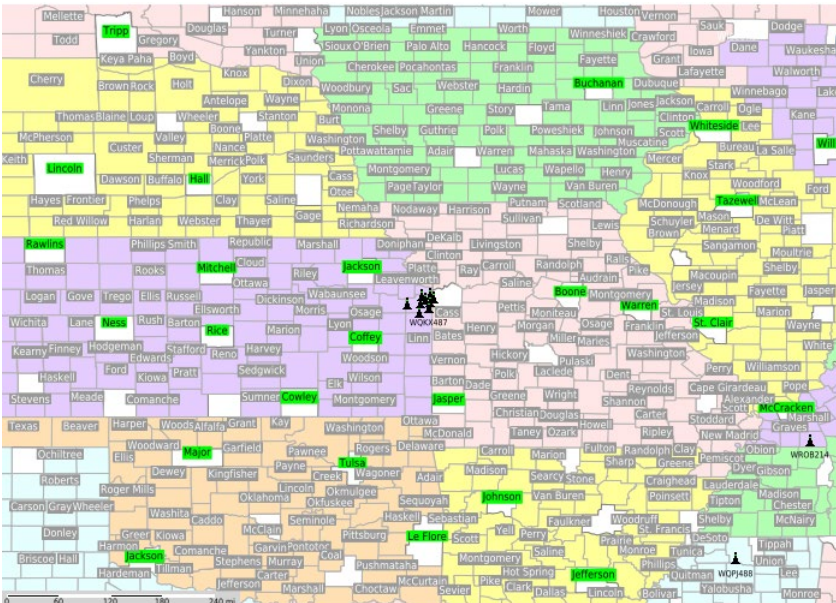

Channel No:

OK

(Click on "Show Map" to populate the details.)

Any county that the frequency is allotted to will show as white. When you select the region's option the map coloring will change so each region is a different color to make it easier to tell if it is in your region when you zoom in. The image above shows purple for KS and pink for MO. Below is a map showing a larger section of the map. Each of the white counties is allotted the channel selected. You will also see that at the bottom of the map the frequency/channel you searched is listed.

Filter: Antenna Site(s): Frequency: 772.58125

Filter: Region(s): Channel No: 179-180

Public Information: Under public information you can see FCC notices, documents for 700 MHz Regional Planning and a site map of the website.

Resource Links: Here you will find links to the 700/800 MHz RPC Directories, links to all of the public safety coordinators and links to a few other organizations.
