Region 53<sup>1</sup>: 700 MHz Plan Amendment

APPENDIX: O: Amend the Region 700 MHz Public Safety Plan<sup>2</sup> for General Use spectrum in the 769-775/799-805 MHz band.

*Regarding the FCC Commission release of the narrowband reserve channels (twenty four 12.5 kHz channels) for General Use under the administration of the RPCs for the benefit of state and local public safety users:*

The Commission released the reserve channels for General Use under RPC administration with priority access given to T-Band incumbents.... The Commission stated, “RPCs have the flexibility to designate a mixture of General Use and temporary (deployable trunked infrastructure) channels in their Regional Plans.” To the best of our knowledge, no T-Band licensees are/were allocated in Region 53.

*Region 53 Plan Amendment.* The Region 53 Plan Amendment changes the plan to incorporate *all of* (1) the new general use channels (*i.e.* the former reserve channels); (2) the channels recommended by NPSTC and the NRPC for deployable trunked systems; and (3) vehicular repeater systems. Due to the complexities of spectrum management Region 53 will hold all re-allotted channels in the General Use Pool for re-allocation to be determined upon the request of public safety entities for these resources to meet the needs of the specific agency, jurisdiction, and county.

This list of channels will be held in the General Use Pool for repurposing when and where needed by public safety agencies. The General Use Pool channels will provide optimal flexibility to meet unanticipated public safety spectrum requirements throughout the region. This will allow the RPC to allocate the new channels through coordination without locking down valuable resources.
