## COMMENTS INVITED ON KENTUCKY PUBLIC SAFETY PLAN

The Commission has received the public safety radio communications plan for Kentucky (Region 17).

In accordance with the Commission's Memorandum Opinion and Order in General Docket 87-112, Region 17 consists of the state of Kentucky. (General Docket No. 87-112, 3 FCC Rcd 2113 (1988)).

In accordance with the Commission's Report and Order in General Docket No. 87-112 implementing the Public Safety National Plan, interested parties may file comments on or before June 14, 1993 and reply comments on or before June 29, 1993. (See Report and Order, General Docket No. 87-112, 3 FCC Rcd 905 (1987), at paragraph 54.)

Commenters should send an original and five copies of comments to the Secretary, Federal Communications Commission, Washington, D.C. 20554 and should clearly identify them as submissions to PR Docket 93-132 Kentucky-Public Safety Region 17.

Questions regarding this public notice may be directed to Betty Woolford, Private Radio Bureau, (202) 632-6497 or Ray LaForge, Office of Engineering and Technology, (202) 653-8112.

Before the  
Federal Communications Commission  
Washington, D.C. 20554

PR Docket No. 93-132

In the Matter of

Kentucky Public Safety Plan

ORDER

Adopted: July 28, 1993;

Released: August 3, 1993

By the Chief, Private Radio Bureau and the Chief Engineer:

1. On January 28, 1993, Region 17 (Kentucky) submitted its Public Safety Plan to the Commission for review. The Plan sets forth the guidelines to be followed in allotting spectrum to meet current and future mobile communications requirements of the public safety and special emergency entities operating in Kentucky.

2. The Kentucky Plan was placed on Public Notice for comments due on June 14, 1993, 58 FR 28018 (May 12, 1993). The Commission received no comments in this proceeding.

3. We have reviewed the Plan submitted for Kentucky and find that it conforms with the National Public Safety Plan. The plan includes all the necessary elements specified in the *Report and Order* in Gen. Docket No. 87-112, 3 FCC Rcd 905 (1987), and satisfactorily provides for the current and projected mobile communications requirements of the public safety and special emergency entities in Kentucky.

4. Therefore, we accept the Kentucky Public Safety Radio Plan. Furthermore, licensing of the 821-824/866-869 MHz band in Kentucky may commence immediately.

FEDERAL COMMUNICATIONS COMMISSION

Ralph A. Haller  
Chief, Private Radio Bureau

Thomas P. Stanley  
Chief Engineer

## CHANGE IN OFFICIAL MAILING ADDRESS FOR DOCKETED AND RULEMAKING PROCEEDINGS

Mail to: Federal Communications Commission  
The Secretary  
1919 M Street, N.W., Room 222 - Stop Code: 1170  
Washington, DC 20554

1. Docket or Rulemaking Number(s):

2. Applicant/Petitioner:

3. Street Address or Post Office Box:

4. City, State, and ZIP Code:

Section 1.5 of the Commission's Rules requires an attorney to keep the Commission informed of any change in mailing address in order that the station may be served documents or other official papers without delay.

Only one mailing address can be maintained for each applicant.

Forward the original and two copies to the Secretary.

Reference 800 MHz NPSPAC Plan Amendment WT Docket No. 02-55, [NPSPAC Docket No. 93-132]

Dear Chief Furth:

Enclosed please find the Region # 17 NPSPAC Streamline Plan Amendment. The Public Safety Working Group, Region 17 800 RPC, of the Kentucky Wireless Interoperability Executive Committee respectfully requests the FCC process this streamlined amendment allowing us to better utilize the existing rebanded 800MHz narrow band spectrum.

Amendments to the plan include:

1. Replace Pages 26-36 with the re-banded channels sorted by FCC Channel (49 Pages)
2. Replace Pages 37-42 with the re-banded channels Sorted by County (33 Pages)
3. Replace Pages 43-47 with KY State Police Regions Spreadsheet. (1 Page)

Sincerely:

A handwritten signature in blue ink that reads "Bob Stephens".

Robert L. Stephens  
Co-Chair, Region 17 Kentucky

CC: Mr. Derek Nesselrode Chief Engineer  
Kentucky State Police Co-Chair Region 17

**PUBLIC SAFETY AND HOMELAND SECURITY BUREAU APPROVES  
REGION 7 (COLORADO), REGION 14 (INDIANA), REGION 17 (KENTUCKY),  
REGION 49 (TEXAS-AUSTIN), REGION 52 (TEXAS-LUBBOCK), AND REGION 54  
(ILLINOIS-SOUTHERN LAKE MICHIGAN) NPSPAC REGIONAL PLANNING  
COMMITTEES' STREAMLINED AMENDMENTS TO REFLECT 800 MHZ BAND  
RECONFIGURATION IN THE 806-809/851-854 BAND**

**WT Docket No. 02-55, Gen. Docket Nos. 89-363, 89-452, 90-178 and  
PR Docket Nos. 91-162, 92-1, 92-190, 93-132**

*Introduction.* By this *Public Notice*, the Public Safety and Homeland Security Bureau (Bureau) approves the National Public Safety Planning Advisory Committee (NPSPAC) streamlined regional plan amendments (Streamlined Amendments) reflecting the new 806-809/851-854 MHz band allotments submitted by the Region 7 (Colorado),<sup>1</sup> Region 14 (Indiana),<sup>2</sup> Region 17 (Kentucky),<sup>3</sup> Region 49 (Texas-Austin),<sup>4</sup> Region 52 (Texas-Lubbock),<sup>5</sup> and Region 54 (Illinois-Southern Lake Michigan)<sup>6</sup> regional planning committees (RPCs).

*Background.* The *800 MHz Report and Order* and subsequent orders in WT Docket No. 02-55 provide for reconfiguration of the 800 MHz band in order to eliminate harmful interference to public

Docket No. 89-452 (filed Apr. 13, 2009) (submitting Streamlined Plan Amendment).

<sup>2</sup> See Letter from Donald W. Kottowski, Chair, Region 14 (Indiana) Regional Planning Committee to Federal Communications Commission, WT Docket No. 02-55, Gen. Docket No. 90-178 (filed Apr. 13, 2009) (submitting Streamlined Plan Amendment).

<sup>3</sup> See Letter from Robert L. Stephens, Chair, Region 17 (Kentucky) 800 MHz Regional Planning Committee to Federal Communications Commission, Public Safety and Homeland Security Bureau, WT Docket No. 02-55, PR Docket No. 93-132 (filed Apr. 13, 2009) (submitting Streamlined Plan Amendment).

<sup>4</sup> See Letter from Ron Mayworm, Chair, Region 49 (Texas-Austin) 800 MHz Regional Planning Committee to David Furth, Acting Chief, Public Safety and Homeland Security Bureau, Federal Communications Commission, WT Docket No. 02-55, PR Docket No. 92-190 (filed Apr. 10, 2009) (submitting Streamlined Plan Amendment).

<sup>5</sup> See Letter from Robert L. Sanders, Chair, Region 52 (Texas-Lubbock) 800 MHz Regional Planning Committee to David Furth, Acting Chief, Public Safety and Homeland Security Bureau, Federal Communications Commission, WT Docket No. 02-55, PR Docket No. 92-1 (filed Apr. 2, 2009) (submitting Streamlined Plan Amendment).

<sup>6</sup> See Letter from Carl R. Guse, Chair, Region 54 (Illinois-Southern Lake Michigan) 800 MHz Regional Planning Committee to David Furth, Acting Chief, Public Safety and Homeland Security Bureau, Federal Communications Commission, WT Docket No. 02-55, Gen. Docket No. 89-363 (filed Apr. 9, 2009) (submitting Streamlined Plan Amendment).

safety operations within the band.<sup>7</sup> As part of band reconfiguration, in all non-border areas, the former NPSPAC band at 821-824/866-869 MHz has shifted fifteen megahertz lower in the band to 806-809/851-854 MHz, and NPSPAC incumbents are in the process of relocating from the old to the new band. As a consequence of 800 MHz band reconfiguration, all non-border 800 MHz RPCs<sup>8</sup> are required to amend their regional plans currently on file with the Commission to reflect the fifteen-megahertz shift in the NPSPAC band from 821-824/866-869 MHz to 806-809/851-854 MHz.

The Commission's policies require the RPCs to prepare and submit regional plans for use of the NPSPAC band in their respective Public Safety Regions.<sup>9</sup> The RPCs must also update their regional plans as needed to conform to changes in the nationwide NPSPAC band plan, and to reflect other changes in the disposition of NPSPAC channels within the region, technical requirements, or procedures for assigning channels.<sup>10</sup>

On February 10, 2009, the Bureau directed RPCs for non-border NPSPAC regions to file amendments to their 800 MHz regional plans by April 13, 2009, to bring them into conformity with the new 800 MHz band plan.<sup>11</sup> Plan amendments were subject to a streamlined filing and approval procedure provided that they were limited to changes in frequency listings based on the new band plan. Alternatively, RPCs could elect to file amended regional plans by June 10, 2009, that combined rebanding-related changes with other modifications that were not rebanding-related, provided that they notified the Bureau by April 13, 2009 of their intent to do so.

*Review of the Streamlined and Non-Streamlined Plan Amendments.* Streamlined Regional Plan Amendments are limited to shifting channel assignments in the existing plan downward by fifteen megahertz. RPCs were allowed to submit such amendments without obtaining adjacent region concurrence, and were permitted to include administrative updates (*e.g.*, changes to RPC by-laws or membership) in their amendments under this process. The Bureau waived normal public notice and comment procedures for processing the streamlined amendments.

Non-Streamlined Regional Plan Amendments include other substantive modifications to regional plans, *e.g.*, changes to channel allocations within the region, technical parameters, or procedures for assigning channels. RPCs are required to obtain adjacent region concurrence to

<sup>7</sup> See Improving Public Safety Communications in the 800 MHz Band, *Report and Order, Fifth Report and Order, Fourth Memorandum Opinion and Order, and Order*, 19 FCC Rcd 14969 (2004) (*800 MHz Report and Order*).

<sup>8</sup> RPCs for all NPSPAC regions in Waves 1, 2, and 3, other than Region 19 (New England), must file amendments. NPSPAC Region 19 and all NPSPAC regions in Wave 4 are excluded from this requirement, and RPCs for these regions are not required to submit amended plans at this time. We will provide information on the plan amendment process for these regions at a later date, after the 800 MHz Transition Administrator determines replacement channel assignments for NPSPAC licensees in the U.S. – Canada and U.S. – Mexico border areas.

<sup>9</sup> See 47 C.F.R. § 90.16 (no assignments will be made in spectrum designated for the Public Safety National Plan until a regional plan for the area has been accepted by the Commission); *see also* Development and Implementation of a Public Safety National Plan and Amendment of Part 90 to Establish Service Rules and Technical Standards for Use of the 821-824/866-869 MHz Bands by the Public Safety Services, Gen. Docket No. 87-112, *Report and Order*, 3 FCC Rcd 905 (1987) (*National Plan Report and Order*).

<sup>10</sup> See *National Plan Report and Order*, 3 FCC Rcd at 911 ¶57.

<sup>11</sup> See Public Safety and Homeland Security Bureau Provides Guidance on Amendment of 800 MHz Plans to Reflect 800 MHz reconfiguration and on Licensing of New NPSPAC Facilities in the 806-809/851-854 MHz Band, WT Docket No. 02-55, *Public Notice*, 24 FCC Rcd 1364 (PSHSB 2009).

support such plan amendments prior to filing. After initial review, the Bureau will place non-streamlined amendments on public notice for comment prior to approval.

We have reviewed the Region 7, Region 14, Region 17, Region 49, Region 52, and Region 54 Streamlined Plan Amendments and conclude, based on the information before us, that they comply with FCC rules and policies.

Accordingly, pursuant to Section 4(i) of the Communications Act of 1934, as amended, 47 U.S.C. § 154(i), and Section 1.102(b) of the Commission's rules, 47 C.F.R. § 1.102(b), the Region 7, Region 14, Region 17, Region 49, Region 52, and Region 54 800 MHz NPSPAC Streamlined Plan Amendments are APPROVED.

This action is taken under delegated authority pursuant to Sections 0.191 and 0.392 of the Commission's rules, 47 C.F.R. §§ 0.191, 0.392.

Action by the Associate Chief, Public Safety and Homeland Security Bureau.

– FCC –

## **1.0 SCOPE**

### **1.1 Introduction**

In December of 1983, the United States Congress directed the Federal Communications Commission (FCC) to establish a plan to ensure that the communications needs of state and local public safety authorities would be met. By their regular means of initiation, the FCC began the process of developing such a plan. Through their efforts, and the efforts of the national Public Safety Planning Advisory Committee (NPSPAC) the plan was begun.

The National Public Safety Planning Advisory Committee provided an opportunity for the public safety community and other interested members of the public to participate in an overall spectrum management approach by recommending policy guidelines, technical standards, and procedures to satisfy public safety needs for the foreseeable future. After consideration of NPSPAC's Final Report and comments filed in Docket No. 87-112, a Report and Order was released by the FCC in December 1987, which established a structure for the National Plan that consists of guidelines for the development of regional plans. Six megahertz of spectrum was selected in the 821-824 and 866-869 MHz band, since they were already being used for public safety purposes.

The National Plan provides guidelines for the development of regional plans. The particulars of this plan are found in FCC 87-359, which contains the required steps and contents for regional plan development. It is on this document that this plan is developed.

### **1.2 Purpose**

Public safety communications has, for many years, been inadequate throughout the United States. This is as true for Kentucky as it is for any other state. Many, if not all, public safety radio users are constantly bombarded with outside interference, noise, and over crowding. It is with these problems in mind that this plan was developed.

This regional plan was developed with the objective of assuring all levels of public safety/public service agencies that radio communications in the near and distant future will not suffer from the problems of the past. The allocation of frequencies was done in as equitable a way as possible. The goal was to supply a pool of frequencies for each county and a pool for state agency use with adequate reserve allocations for future needs in all areas, and a method to appeal initial allocations based on need.

The National Plan, as developed by NPSPAC, was followed very closely in all considerations for frequency allocation, re-use, turn back, regional interoperability, spectrum requirements and adjacent region operations. This plan should provide the flexibility to accommodate the growth and changes which are bound to occur in public safety and public service communications operations long into the future.

## **2.0 AUTHORITY**

### **2.1 Regional Planning Committee**

The development of the Public-Safety Radio Communications Plan for Region 17, the State of Kentucky, has followed the requirements of the FCC's Report and Order as issued in the matter of General Docket 87-112.

In accordance with the FCC's Report and Order 87-112, the Associated Public-Safety Communications Officers Inc. (APCO) recommended to the Commission the appointment of a "Convenor" for Kentucky Region 17. The Convenor served as the coordinator for the assembly and formation of the planning committee.

Participants in the formation of the Regional Planning Committee represent interested parties from both the Public Safety and Special Emergency Radio Services. A total of 33 individuals have participated in the development process. The list herein contains the names, organizational affiliations and mailing addresses of all participants in the Regional Planning Committee (Section 6.0).

The committee was selected by attendance at the planning meeting. Each member of the Committee representing an eligible licensee under the Public Safety Radio Services and the Special Emergency Radio Services was entitled to one vote in all Committee matters. Except as may be provided elsewhere in the Plan, the majority of those present at a scheduled meeting constituted a majority for all business. The final approval of the plan, prior to submission to the FCC, required a vote from a majority of members in attendance during the final review meeting. The plan was also discussed during a meeting of public safety officials on January 20, 1993 in Morehead, Kentucky. More than eighty individuals, representing all components of public safety agencies were present during this discussion. This way, the finished plan was reviewed and accepted by the widest, within reason, group of safety/public service users.

### **2.2 Planning Committee Formation**

The process of forming the Planning committee was conducted in the following steps:

Personal interviews were held with the representatives of all major state agency radio users.

Presentations concerning the requirements for a regional planning committee were presented and discussed at state organization meetings. At each presentation there was an opportunity for persons to place themselves and/or their agency on the mailing list.

Letters of announcement were mailed to each major state agency radio Users, those placed on the mailing list, as well as to state organizations composed of local government level public safety/public service users. Letters were also sent to all members of the Kentucky Chapter of APCO. This was done May 1, 1989. The announcement was posted throughout the region from April through June 1989. The first meeting was held at the Farnham Dudgeon Civic Center, Frankfort, Kentucky, a public facility.

4. An organizational meeting was held for Region 17, Kentucky on June 1, 1989. Mr. Jack Y. Sharp was elected chairman of Region 17 by the group in attendance.
5. Committee membership was left open to any person or agency, which may not have been notified or decided to join the committee later.
6. Vendors participation was encouraged, but vendors were not allowed a vote.

## **2.3 National Interrelationships**

The Regional Plan is in conformity with the National Plan. If there is a conflict between the two plans, the National Plan will govern. It is expected that Regional Plans for other areas of the country may differ from this plan due to the broad differences in circumstance, geography, and population density. By officially sanctioning this plan the Federal Communications Commission agrees to its conformity to the National Plan. Nothing in the Plan is to interfere with the proper functions and duties of the organizations appointed by the FCC for frequency coordination in the Private Land Mobile Radio Services, but rather it provides procedures that are the consensus of the

Public Safety Radio Services and Special Emergency Radio Service user agencies in this Region. If there is a perceived conflict then the judgement of the FCC will prevail.

## **2.4 Federal Interoperability**

Interoperability between the Federal, State and Local Governments during both daily and disaster operations will primarily take place on the five common channels identified in the National Plan. Additionally, through the use of S-160 or equivalent agreements, a licensee may permit Federal use of a non-federal communications system. Such use, on other than the five identified common channels, is to be in full compliance with FCC requirements for government use of non-government frequencies (Title 47 CFR, sec 2.103). It is permissible for a non-Federal government licensee to increase channel requirements to account for 2-10 percent increase in mobile units, dependent on the amount of Federal Government Agencies involvement in its area, provided that written documentation from Federal agencies supports at least that number of increased units.

## **2.5 Kentucky Regional Conformance Review Committee**

Upon approval of this Plan by the Federal Communications Commission, a Kentucky Region Conformance Review Committee (KRCRC) will be established for the review of applications which do not fall within the stated guidelines provided for in this plan, or for the settlement of disputes concerning this plan and/or its application.

This committee shall consist of the Local APCO Frequency Advisor for this region, one representative from each of the current primary 800 MHz Planning Areas (Louisville, Lexington, Northern Kentucky area); five (5) representing state-wide public safety agencies (Kentucky State Police, Kentucky Department of Transportation, Kentucky Emergency Medical, Kentucky Disaster Emergency Services, Kentucky Fish and Wildlife); a member representing the Sheriff's Departments across the state; a member representing the office of City Police Chiefs; a member representing the Kentucky Chapter of APCO; and four (4) public safety at large members. Members representing the state agencies (KSP, DOT, DES, Fish and Wildlife) will be selected by the head of each of the specific state agencies. It will be suggested to the agency heads that the specific title of an individual, i.e. Director of Communications for that agency, be selected as the representative. Thereafter, as personnel changes occur within that position, the individual assuming those responsibilities for those state agencies will automatically become that agencies representative to the KRCRC. These terms will be non-expiring. The term of local APCO Frequency Advisor Committee Chairman is also non-expiring. The individual selected by Kentucky APCO to serve in the Frequency Advisor capacity will automatically be a member of the KRCRC.

The Sheriff's representative will be selected by the Kentucky Sheriff's Association, the Police Chief's representative will be selected by the Kentucky Police Chief's Association and the Kentucky APCO's representative will be selected by the Kentucky APCO Chapter. The representatives of the Kentucky Sheriffs, the Chief of Police and the Kentucky APCO will serve a term of one year. Those terms will begin on January 1 of each year and expire on December 31 of the same year. There is no prohibition against successive terms by the same representative from each of the Associations. In fact, during the early stages of the development of the 800 MHz systems within the Region, continuity of personnel could be highly advantageous.

Additionally, the KRCRC may select up to four (4) additional at-large members to represent various segments of the public safety community. Nominations may be submitted to the KRCRC by any public safety agency within the state. Any member of the KRCRC may also nominate candidates. All nominations received must include sufficient information regarding the applicant, their education and work experience background to permit an informed decision regarding the benefits to the KRCRC that selection of this candidate might provide. Candidates will be reviewed annually by the KRCRC. If at-large membership is deemed beneficial for the responsibilities of the KRCRC, an election will be conducted at least sixty (60) days prior to the end of the calendar year. In order to be elected, a candidate must receive more than 50% of the votes from the number of members in attendance. In the event that more than four candidates are selected by the KRCRC, the four with the highest number of votes will be offered membership to the KRCRC. The term of office for the at-large members will be for one calendar year, from January 1 through December 31. At-large members may be nominated and selected to more than one consecutive term.

Nine (9) members plus the designated chairman must be present to constitute a quorum. Each of the nine members shall vote on issues. The KRCRC Chairman, in the case of a tie vote, may cast a vote. The KRCRC will convene upon the Commission's approval of this plan.

This committee and its composition will be assured by the Kentucky APCO Chapter and other Public Safety organizations. Since this committee will probably not have regular business, it will be up to the Local APCO Frequency Advisor to notify the committee of problems, conflicts, or when it becomes apparent that spectrum demands will outpace available spectrum. Each member of the committee shall be furnished a copy of this plan upon their appointment or election to the committee.

Plan updates shall be accomplished by this committee. All changes or updates to the plan shall be first agreed upon by this committee and then submitted to the FCC for their review and consideration. When approved all changes shall be added to the plan with the appropriate documentation of approval.

This committee shall meet at least once annually to review the implementation of the plan. This review shall consist of examination of any and all license activity.

### **3.0 SPECTRUM UTILIZATION**

This portion of the Plan provides a basis for proper spectrum utilization. Its purpose is to guide the Local APCO Frequency Advisor and/or the Regional Review Committee in their task of evaluating the implementation of this plan within this Region.

#### **3.1 Region 17 Defined**

Region 17 is the State of Kentucky. This region is the result of definition by the Federal Communications Commission as a result of recommendations made in the National Public Safety Planning Advisory Committee (NPSPAC) plan as submitted and approved and contained in Docket 87-112. For purposes of this plan the State of Kentucky shall be defined as all the lands and waters contained within the boundaries of the State of Kentucky.

#### **3.2 Region Profile (Demographic Information)**

The purpose of this section is to provide the basis for the assignment of frequencies, and their re-use. Since the frequency allocation formula used is based on population within a county, it is necessary to provide this information within this plan. The data used in the determination of frequency allocations is attached (Attachment 2 & 3)

##### **3.2.1 State OF Kentucky Population And Expected Growth Percentage. (See Attachment 3)**

The population of Kentucky is 3,685,296. The urban population is some 60 percent and rural 40 percent. The population within developed urban areas is about 60 percent or 2,211,177.

##### **3.2.2 Geographical Description**

There are 120 counties in the state with a total landmass of 40,395 square miles. The largest county is Pike County, with a total of 782 square miles. Water areas of significance are the lake areas such as Kentucky Lake, Lake Cumberland, Lake Barkley, etc. and many rivers, which support many recreational endeavors.

As is shown above, the population of the state is 3,685,296 distributed across the land area contained in the state. This presents some problems in area coverage for radio systems in that the entire land area of any given jurisdiction must be covered. The population per square mile is somewhat sparse which generally indicates that the concentration of radio users for public safety activities is also sparse. All of these items were taken under consideration in the allocation plan.

### **3.3 Usage Guidelines**

All systems operating within the Region having five or more channels will be required to be trunked. Those systems having four or less channels may be conventional or trunked.

The FCC, in its Report and Order states, “Exceptions will be permitted only when a substantial showing is made that alternative technology would be at least as efficient as trunking or that trunking would not meet operational requirements. Exceptions will not be granted routinely, however, strong evidence showing why trunking is unacceptable must be presented in support of any request for exception.”

Systems of four or less channels operating in the conventional mode who do not meet FCC loading standards will be required to share the frequency on a non-exclusive basis.

Public Safety communications at the state level, as it impacts the Region, will be reviewed by the Committee. State-wide public safety agencies will submit their communications plans for impact approval if they utilize communications systems within the Region and those portions of such systems must be compatible with the Regional Plan.

The next level of communication coverage will be a county/multiple municipality area. Those systems that are designed to provide area communication coverage must demonstrate their need to require such wide area coverage.

This would apply in a situation such as a city requesting coverage of an entire county. Communication coverage beyond the bounds of a jurisdictional area of concern cannot be tolerated unless it is critical to the protection of life and property. If the 800 MHz

trunked radio technology is utilized, the system design must include as many county/multiple municipality government public safety and public service radio users as can be managed technically.

The county/multiple municipality agency (ies), depending upon systems loading and the need for multiple systems within an area, must provide intercommunications between area-wide systems. In a multi-agency environment, a lead agency using the 800 MHz spectrum, which is an agency or organization having primary response obligations in the geographic area, shall be responsible for coordinating the implementation the Common Channels in this band as mandated by the National Plan. Such implementation must be reviewed and approved by the Local APCO Frequency Advisor and at his/her discretion, the Regional Review Committee.

Municipal terminology often differs. In order to provide a title for the next level of communications the term city-wide is used to define the level below county-wide. City-wide communications for public safety and public services purposes must provide only the communications needed within its boundaries. However, if the total number of radios in service does not reach minimum loading criteria for a trunked system, they must consider utilizing the next higher system level if 800 MHz trunked radio is available in the area. As those higher level systems reach capacity, the smaller system communicators in public safety and public service must then consider uniting their communications efforts to formulate one large system or forfeit use of the limited 800 MHz system.

Where smaller conventional 800 MHz needs are requested, those frequencies to be utilized must not interfere with the region's trunked systems. The 800 MHz regional trunked radio system is to be considered the higher technology at this time and in greater compliance with FCC guidelines. The amount of interference that can be tolerated depends on the service affected. Personal life and property protection shall receive the highest priority and disruptive interference with communications involved in these services in an area shall not be tolerated. Any co-channel interference within an authorized area of coverage will be examined on a case by case basis by the Regional Review Committee.

### **3.4 Technical Design Requirements For Licensing**

#### **3.4.1 Definition of Coverage Area or Area of Jurisdiction**

The coverage area shall be that area for which a system is intended to cover with received signal strength of greater than 40 dBu. This area shall normally represent the

boundaries of the County or the incorporated municipality, which is applying for the license. In the case of regional or area-wide, multi-jurisdictional systems, the coverage shall be that area of all jurisdictions participating system combined.

### **3.4.2 System Coverage Limitations**

System coverage shall be limited to the coverage area defined as listed above plus no more than three (3) additional miles in all directions extending from said boundaries of definition. This limitation shall assure maximum frequency reuse. The only exception to this rule shall be those applicants wishing to offer service or system use to areas outside of their jurisdictional boundaries. In these situations the applicant shall provide a proposal of said service to the Local APCO Frequency Advisor, who may request Regional Review Committee consideration, for approval.

Systems not located within the geographical center of the jurisdiction(s) for which they cover shall utilize either directional antennas or antenna/tower relationship techniques to achieve the coverage required by this plan.

### **3.4.3 Determination Of Coverage**

There are four variables used in determining the area of coverage of a proposed system. These variables are (1) the required strength of the received signal, (2) antenna height above average terrain (HAAT), (3) the effective radiated power (ERP) of the system, and (4) the type of environment.

Received Signal Strength:

For purposes of this plan, received signal strength shall be the determining factor, which defines the actual boundary of a system. The minimum signal level, which marks the outer boundary of a system, shall be 40 dBu.

Antenna Height:

Shall be the height of the antenna above the average terrain surrounding the tower site.

Effective Radiated Power (ERP):

The ERP is the transmitter output power times the net gain of the antenna system. The actual formula is:  $ERP (w) = Power (w) \times Log (net\ gain\ in\ dB\ divided\ by\ 10)$ .

Environment Type:

OKUMURA/HATA METHOD – The Okumura method uses four different classifications to describe the average terrain around a transmitter site or area. The classifications are:

- 1- URBAN; Which is built-up city-crowded with large buildings or closely interspersed with houses and thickly grown trees. This would include the downtown area of a major city.
- 2 – SUBURBAN; Which is a city of highway scattered with trees, houses and buildings. This would include the downtown area of a large city.
- 3 – QUASI- OPEN; Is an area between suburban and open areas. This includes areas outside of city limits that have few buildings and houses.
- 4 – OPEN; Is an area where there are no obstacles such as tall trees or buildings in the propagation path or a plot of land which is cleared of anything for 300 to 400 meters ahead. This would include farmland, open fields, etc.

Preparation of these requirements shall be the responsibility of the applicant. The Federal Communications Commission provides in part 90.309(a)(4) of the Rules and Regulations, some additional guidance for these calculations.

#### **3.4.4 Annexations And Other Expansions**

It is well known that as cities grow, annexations occur. When an expansion of the present city limits of any city currently using an 800-megahertz system within the spectrum as herein specified occurs, it is understood that the existing system may have to be expanded and its range increased. This is a modification and may be permitted. The increased range of the system will have to be determined at the time of modification to assure non-interference with any other existing system. Where interference is likely, the use of alternate methods of expansion, such as satellite systems, may be necessary.

Should the annexation or expansion of a city effectively take in all or most of a county, the allocation for that county may be given to the city if required by said city and not in use or planned to be used by the county. Where more spectrum is not available from the

initial allocation, the rules for expansion of initial allocation, as contained in this plan, shall apply.

#### **3.4.5 Coverage Area Description**

All applicants shall provide with their applications a map showing the jurisdictional boundaries to be covered by the system, and the calculated system coverage. This map shall display the location of the system transmitter(s), including control stations. It is recommended that a U.S. Geological Survey (USGS) Quad topographical map be used for this purpose. If not available, a high quality locally produced map or a highway map may be substituted. Regardless of the type map used, the name of the applicant and the scale of the map shall be displayed on the map.

#### **3.4.6 Aircraft to Ground Communications**

The use of 800 MHz radio in an aircraft for air-to-ground transmissions shall be limited to a maximum effective radiated power (ERP) of one (1) watt. Aircraft on the ground will be considered a mobile and can use additional power and the appropriate frequencies.

Since aircraft operations of trunked or conventional radio systems tends to disrupt adjoining systems because of height of the transmitting aircraft above ground level, aircraft shall be limited in height of use. No transmissions on area channels are allowed above 2,000 feet AGL, and no transmissions are allowed above 3,000 feet AGL on wide area mutual aid channels.

Simplex (talk around) operations of aircraft radios shall be utilized for on-scene communications. Co-channel and adjacent channel users are not required to provide protection to airborne users.

#### **3.4.7 Give-Back Frequencies**

All agencies participating in the use of any 800-megahertz spectrum shall prepare and submit a plan for the abandonment of their currently licensed frequencies in the lower bands. These released frequencies shall be available for reassignment to those agencies not migrating to 800 MHz at this time. These released frequencies shall then be

available for reassignment by the assignment/coordination criteria in effect for that particular service by the regular FCC authorized coordinator for that service.

Mutual aid channels, intersystem channels and other emergency channels:

|             |                              |
|-------------|------------------------------|
| 155.370 MHz | Police Point – to – Point    |
| 155.475 MHz | Police Mobile – to – Mobile  |
| 155.340 MHz | EMS Mobile – to – Hospital   |
| 155.280 MHz | EMS Hospital – to – Hospital |
| 154.280 MHz | Fire Mutual Aid              |
| 155.220 MHz | EMS Dispatch Common          |
| 155.160 MHz | EMS Dispatch Common          |

These frequencies used by Public Safety and Special Emergency Radio Services are designated by Kentucky State Government Planning are exempt from the relinquishment requirement.

Frequencies, which are to be abandoned by an agency, shall not be handed down to another agency within the respective jurisdiction. Though this may seem a convenient method to re-use existing radio equipment, the reassignment must be handled through the normal process. It is recommended that any jurisdiction wishing to “hand down” frequencies to another agency submit the proper coordination and application forms with the document of release. This will put the applicant in a better posture for reassignment of the frequency in question. It should be noted that even though this procedure is followed, there is no guarantee that a particular frequency will be assigned to the returning jurisdiction.

The time frame allowed for phasing into 800 MHz and out of the lower currently licensed bands will be considered on a case by case basis by the review committee. Generally, one year will be considered acceptable in most cases, with two years as a maximum. Any agencies requiring more than two years shall provide documents stating the reasons for the delay, and give the estimated time of completion.

### **3.4.8 Unused Spectrum**

Due to the fact that the entire frequency spectrum is not needed at this time, the excess channel pairs will be returned to a reserve pool. These channels may be used for conflict with adjacent Region allocations or may simply remain within this Region until needed. This does not imply that these frequencies are unavailable, only that before they can be utilized within the Region they must be coordinated via the regular APCO

coordination process and within the guidelines set forth in this plan. Where possible, the channels designated for a jurisdiction in this plan shall be used.

### **3.4.9 Adjacent Region Coordination's**

Coordination with adjacent regions shall be an on-going process until all region plans have been finalized. At present, all adjacent regions have been coordinated with and no conflicts have been identified. The adjacent regions with which coordination has been conducted are Indiana (Region 14); Ohio (Region 33); Illinois (Region 13); Virginia (Region 42); West Virginia (Region 44); Tennessee (Region 39) and Missouri (Region 24). (ATTACHMENT 6)

As the use of the five National channels is not considered a day-to-day function, the "hard" coordination for the use of these channels is not considered to be necessary or advisable. The use of these channels will always be on a non-interference basis, with on-the-air coordination at the time of use when required. Any user found to be operating in any manner other than this shall be considered to be operating improperly and subject to the existing Federal Communications Commission rules for willful interference with the communications of other users.

## **3.5 Initial Spectrum Allocation**

### **3.5.1 Frequency Sorting Methodology**

The initial spectrum allocation for Kentucky was determined by a computerized frequency sorting process performed by APCO. The purpose of the computer program, which assigns frequencies to specific eligibles, and to pools for future assignments is two-fold:

- A) The assignments must result in a high degree of spectrum efficiency
- B) The assignments must result in a low probability of co-channel and Adjacent channel interference.

Since the desired output is a geographic sorting of frequencies, a method of defining geography must be part of the input. A list of the number of channels to be assigned in each geographic area is also required, along with the name of the eligible or pool.

Acceptable interference probabilities are determined for the Region. Frequency assignments are then made using a computer program, which satisfies the goals of

spectrum efficiency and interference protection. The following narrative describes the factors and process used by the computer program.

### **3.5.2 Geographic Area**

For the purpose of this frequency sort, a geographic area is defined as one or more circles of equal radius. To the degree practical, the circle(s) should include the entire area of the eligible's geopolitical boundary, but not exceed the boundary by more than three- (3) miles. Thus, the procedure is to gather maps of sufficient detail, outline the areas to be defined, determine the coordinates and radius of the circles, which define each area, and tabulate the data.

### **3.5.3 Define The Environment**

The environment of each system is defined according to the Okumura/Hata method of classifications. See Section 3.4.3.

### **3.5.4 Blocked Channels**

In the Region there are five mutual aid channels which must be blocked out to prevent the computer from making assignments on these channels. (Since the mutual aid channels are spaced at 0.5 MHz intervals, other Region-wide systems are spaced at 0.5 MHz and placed adjacent to the mutual aid channels. This procedure reduces the impact of blocked adjacent channels by virtue of the fact that the channel plan already has protection spacing on each side of the mutual aid channels.) These Region-wide blocked channels are identified by FCC channel number, tabulated and they become input to the computer program.

### **3.5.5 Transmitter Combining**

The computer program is designed to provide a minimum frequency separation between any two channels assigned to the same eligible at the same site. This separation is provided in order to enable more efficient combining of multiple transmitters to a single antenna. These separated blocks of frequencies also have a maximum size. That is, if the eligible has more frequencies than the maximum size of the combining block, then a second compatible block is created, and so on. Each of these parameters is adjustable in the program on a global basis. The default parameters chosen are 0.25 MHz minimum spacing and five channel blocks.

### **3.5.6 Special Considerations**

There are licensees in the 806-821/852-866 MHz spectrum who plan to expand existing systems into the 821-824/866-869 MHz bands. Some of the existing radio units are unable to operate on 12.5 KHz separated carrier frequencies. The result is that these radios can only operate on “even” FCC numbered channels in the 821-824/866-869 MHz band. The computer program is able to take this into account when making assignments.

### **3.5.7 Grandfathered Equipment**

Radio equipment that is currently type excepted in the public safety systems in the 806-821 MHz band may continue to operate on the 821-824/866-869 MHz channels, provided the deviation is reduced to +/- 4 KHz.

### **3.5.8 Protection Ratios**

There are two interference protection ratios built into the computer program. One is for the co-channel case; the other is for the adjacent channel case. The ratios provide 35 dB Desired/Undesired ratio for the adjacent channel case. These ratios provide an acceptable probability of interference for Public Safety Services.

## **4.0 COMMUNICATIONS REQUIREMENTS**

### **4.1 Common Channel Implementation**

The implementation of the International common Channels must follow the guidelines as set forth by the Federal Communications Commission by the approval of the National Plan. The National Plan has set aside five (5) channels in the new spectrum for mutual aid. These channels are accessible by all levels of government and shall be used in accordance with the provisions of the National Plan. Agencies applying for license in the 821-824 and 866-869 MHz bands shall be required to explain how they will implement the new Common Channels. They will also be required to explain how they will maintain intercommunication with their neighboring agencies who do not implement the Common Channels, but still are dependent upon the applying agency for assistance in an emergency. All mobile and portable equipment must be equipped to operate in the “talkaround mode” on the International Common Channels.

The International calling channel (821/866.0125 MHz) shall be implemented as a full mobile relay. Wide area coverage transmitters will be installed where applicable within

a system. Large system users (5 channels or more) of 800 MHz shall be required to monitor this channel at all times. The area of coverage for this channel shall be equal to the area covered by the licensed system. This may or may not require the use of satellite receivers within the area to meet this requirement.

The four International Tactical (ITAC) Channels will be assigned State-wide, for use as needed by all eligible licensees. These channels are used in accordance with the National Plan and in compliance with the regulations as set forth by the Federal Communications Commission. These channels require no special licensing, only that the users be eligible for licensing on the other Public Safety 800 MHz channels as specified in section 90.616 (a) of the FCC Rules and Regulations.

#### **4.1.1 Areas of Operation**

The common channels shall be available for use throughout the Region. No specific assignments were deemed necessary within the Region.

#### **4.1.2 Operation on The Common Channels**

Normally, the five interoperable channels are to be used only for activities requiring inter-communications between agencies not sharing any other compatible communications system. Interoperable channels are not to be used by any level agency for routine, daily operations. In major emergency situations, one or more ITAC channels may be assigned by the primary Public Safety Agency within that area of operation. The primary Public Safety agency in each county, if not defined elsewhere in the plan, shall be the Kentucky State Police or the County Sheriff's Department or the lead agency, which may be any agency licensed to operate in this spectrum, or "on-scene" commander. The primary Public Safety agency shall be the city level Public Safety Department in situations, which occur within the corporate limits of, said city. These primary agencies will assign one or more of the ITAC channels for use according to need during each special situation requiring the use of these channels. All applicants are required to include the Calling Channel and the four- (4) tactical channels in their mobile and portable units, with talk-around capability.

Participants in the interoperable channels include Federal, State, and Local Disaster management agencies. Police, Fire, and providers of Basic and Advanced Life support services will be the primary using agencies. If radio channels are available, other services provided in the Public Safety Radio Services and the Special Emergency Radio Services may also participate to the extent required to insure the safety of the public. These agencies include the Highway Department, Motor Vehicle Department, Forestry,

Wildlife and other special service agencies not normally involved in day-to-day public safety operations.

#### **4.1.3 Operation Procedures**

On all Common Channels, plain English will be used at all times, and the use of unfamiliar terms, phrases, or codes will not be allowed. The primary public safety agency, with support of the KRCRC will monitor radio traffic discipline and resolve serious or chronic infractions.

#### **4.1.3(I) International Calling Channel (ICALL):**

| <u>FREQUENCY</u>      | <u>TONE</u> |
|-----------------------|-------------|
| 821.0125 MHz (mobile) | 156.7 Hz    |
| 866.0125 MHz (base)   | 156.7 Hz    |

The ICALL channel shall be used to establish contact with other users in a particular Region that can render assistance at an incident. This channel shall not be utilized as an ongoing working channel. Once contact has been established between agencies, an agreed upon ITAC or mutual aid channel shall be used for continued communications.

#### **4.1.3(II) International Tactical Channels (ITAC-1 – ITAC-4):**

| <u>FREQUENCY</u>         | <u>TONE</u> |
|--------------------------|-------------|
| 1. 821.5125 MHz (mobile) | 156.7 Hz    |
| 866.5125 MHz (base)      | 156.7 Hz    |
| 2. 822.0125 MHz (mobile) | 156.7 Hz    |
| 867.0125 MHz (base)      | 156.7 Hz    |
| 3. 822.5125 MHz (mobile) | 156.7 Hz    |
| 867.5125 MHz (base)      | 156.7 Hz    |
| 4. 823.0125 MHz (mobile) | 156.7 Hz    |
| 868.0125 MHz (base)      | 156.7 Hz    |

These frequencies are reserved for use by those agencies involved in inter-agency communications. Incidents requiring multi-agency participation will utilize these frequencies as directed by the control agency assuming responsibility for an incident or area of concern. These frequencies may be subdivided according to function in an

incident or by geographical location in response to an incident. It is recommended that the following assignments for ITAC-1 through ITAC-4 be used when possible.

|             |                            |
|-------------|----------------------------|

| ITAC-4..... | Command and Control        |

**4.1.4 Coded Squelch**

All equipment capable of operating on the five- (5) common channels shall be equipped with the National Common Tone Squelch of 156.7 Hz. Mobile relays on these channels, if authorized, may use additional tone or digital squelch codes for the purpose of selecting individual mobile relay stations, provided the National Common Tone Squelch Code is used on the output. If such an arrangement is utilized, provision must also be made for certain centralized, high level sites to be activated by the 156.7 Hz tone to ensure emergency access by transient units.

**4.2 Network Operating Methods**

Communications systems on ITAC-1 through ITAC-4 will be implemented by agencies who volunteer on a distributed coordinated basis. Every primary geographic section of the Region is intended to be covered by at least one of the ITAC channels. In many areas the common channels will be utilized on a mobile to mobile talk-around basis. Mobile relays on ITAC-1 through ITAC-4 will be on a limited coverage design to permit reuse of the channel several times within the Region and in adjacent regions. Since Region 17 will probably not have a large number of stationary ITAC Channel stations, the implementation of mobile relay or repeaters is strongly encouraged. This will fill an “on-scene” requirement for most multi-agency response situations.

Adjacent region coordination will be via existing mutual aid coordination procedures with the requesting region establishing the tactical frequency assignment.

**4.3 Requirements For Trunking**

All systems operating in the Region having five or more channels will be required to be trunked. Those systems having four or less channels may be conventional. It is strongly suggested that any entity licensing three or more repeaters use trunking. The FCC in its Report and Order states: “Exceptions will be permitted only when a substantial showing is made that alternative technology would be at least as efficient as

trunking or that trunking would not meet operational requirements. Exceptions will not be granted routinely. Strong showings as to why trunking is unacceptable must be presented in support of any request for exception.” Systems that do not meet FCC loading standards can be required to share such frequencies on a non-exclusive basis. Those agencies requesting Data channels only can be required to share channels with adjacent agencies wherever feasible or limit coverage to their geographic area. The Regional Review Committee will consider exceptions on a case-by-case basis.

Depending on systems loading and the need for multiple systems within an area, operators of wide area systems (including, but not limited to, designated “Monitoring Agencies”) must provide for coordination between area-wide systems and “Monitoring Agencies”. Single municipalities or agencies must restrict design and implementation of their system(s) to provide only the communications needed within its geopolitical boundaries. The use of trunked systems is encouraged. However, if the total number of radios in service does not reach minimum loading criteria for a trunked system, that user must consider utilizing the next higher system level if 800 MHz trunked radio is available in the area. As systems reach capacity, the smaller system users must consider consolidating their communications systems to formulate on large trunked systems

A requesting applicant for radio communications in the 800 MHz public safety services in the Region will be required to conform to the FCC loading criteria for its proposed system. The provisions of this regional plan must be used as a guide for establishing any new systems. Strict adherence for limiting the area of coverage to the boundaries of the applicant agency’s jurisdiction must be observed. Overlap or extended coverage must be minimized, even where systems utilizing 800 MHz trunked radio systems are proposing to intermix systems for cooperative and/or mutual aid purposes.

Antenna heights are to be limited to provide only the necessary coverage for a system. When antenna locations are restricted to only the “high-ground”, transmitter outputs and special antenna patterns must be employed to produce only the necessary coverage with the proper amount of ERP. All necessary precautions are to be taken to gain maximum reuse of the limited 800 MHz spectrum.

#### **4.4 Channel Loading Requirements**

An agency/jurisdiction requesting a single frequency to replace a frequency currently in use that will be turned back for reassignment will not be required to meet loading requirements in order to obtain the new frequency. However, if the single frequency is not loaded to more than 50 units within three years after the license is granted, the frequency will be available for assignment to other agencies on a shared basis in the

event that other frequencies meeting the criteria for assignment are exhausted. Shared use of a frequency is not interference free. Users of single frequency systems may be required to provide the Regional Review Committee “confirmation of loading” for mobiles and portables as a method of validating system loading. This exception shall apply to agencies having only one system and a single frequency. Agencies/jurisdictions requesting multiple frequencies or employing trunking technology shall comply with the loading standards as outlined below. While considering loading, emergency vs. non-emergency requires consideration. Emergency agency refers to those agencies that provide immediate protection of life and property, such as police, fire and ambulance service that have the primary responsibility for initial response to life threatening situations.

#### **4.4.1 Loading Tables**

| EMERGENCY    |               | NON-EMERGENCY |               |
|--------------|---------------|---------------|---------------|
| CHANNELS     | UNITS/CHANNEL | CHANNELS      | UNITS/CHANNEL |
| <b>1-5</b>   | <b>80</b>     | <b>1-5</b>    | <b>100</b>    |
| <b>6-10</b>  | <b>85</b>     | <b>6-10</b>   | <b>110</b>    |
| <b>11-15</b> | <b>90</b>     | <b>11-15</b>  | <b>125</b>    |
| <b>16-20</b> | <b>95</b>     | <b>16-20</b>  | <b>130</b>    |

Agencies requesting additional frequencies must show loading of 100 percent or greater on their existing system. Should a demand for frequencies exist after assignable frequencies become exhausted, any system having frequencies assigned under this plan four or more years previously and not loaded to at least 70 percent will lose operating authority on a sufficient number of frequencies to bring the system into compliance with the 70 percent loading standard. Frequencies lost in this manner will be reallocated to other agencies to help satisfy the demand for additional frequencies.

#### **4.4.2 Traffic Loading Study**

Justification for adding frequencies, or retaining existing frequencies, can be provided by a traffic loading study in lieu of loading by number of transmitters per channel. It will be the responsibility of the requesting agency to provide a verifiable study showing sufficient airtime usage to merit additional frequencies. A showing of airtime usage, excluding telephone interconnect air time, during the peak busy hour greater than 70 percent per channel on three consecutive days will be required to satisfy loading criteria.

#### **4.4.3 Slow Growth**

All systems in the 821-824/866-869 MHz bands under this plan will be slow growth in accordance with Section 90.629 of the Commission's Rules.

#### **4.5 Use of Long Range Communications**

During incidents of major proportions, where Public Safety requirements might include the need for long-range communications in and out of a disaster area, alternate radio communications plans are to be addressed by Primary Public Safety agencies within this sub-region. These agencies should integrate the appropriate interface to do the long distance communications providers. Such long distance radio communications might be amateur radio operations, satellite communications and/or long range emergency preparedness communications systems; any of or all of which should be incorporated as part of the communications plans of those lead agencies. They then could provide the means to communicate outside the area for themselves and the smaller agencies that might need assistance. Instances as addressed in the National Public Safety Planning Advisory Committee's Plan, such as earthquakes, hurricanes, floods, widespread forest fires, or nuclear reactor problems could be a cause for such long-range communications needs.

#### **4.6 Expansion of Existing Systems**

Existing systems that are to be expanded to include the frequency bands of 821-824/866-869 MHz will have the mobile radios "grandfathered", provided that they are modified in conformance with the Memorandum Opinion and Order, FCC Docket 87-112. Primarily this involves reducing the modulation to +/- 4 KHz. Existing base stations in the frequency bands 806-824/866-869 MHz.

### **5.0 IMPLEMENTATION AND PROCEDURES**

#### **5.1 Notification**

Several methods of notification were used to invite interested parties to participate in the development of this plan. Initially, personal contact was made by the "convenor" to all of the major State agency communications users in the State of Kentucky. Announcements were mailed to all Kentucky Police Departments, Sheriff Departments, Sheriff's Association, Fire Departments, Fire Associations, Hospital Associations, Public Safety Radio Vendors, Ambulance Services, State EMS Department, State

Department of Forestry, State Department of Fish and Wildlife, Disaster Emergency Services.

Personal contacts were made to many individuals and agencies several weeks prior to the initial meeting. All APCO Chapter members and a large number of other interested parties who had requested notification were sent letters of invitation. During the initial meeting, names, addresses and telephone numbers of those individuals present who wished to either participate in the planning process, or who wanted to be kept informed of the progress of the planning effort were taken. These individuals or agencies were sent all announcements for meetings and bulletins of progress. (See Attachment 5)

When the work on the plan was completed, a final planning committee meeting was called. This meeting was held at Kentucky State Police Headquarters, 919 Versailles Road, Frankfort, Kentucky on January 22, 1993. Each member of the planning committee was presented with a draft copy of the plan for study. A copy of the final draft was mailed to each member of the committee not present at the meeting. A public notice was placed in the State Journal Newspaper (ATTACHMENT 4) announcing the completion of the plan and the intention to file with the Federal Communications Commission.

## **5.2 Frequency Allocation Process**

The method used for “packing” Region 17 was the APCO computerized method. The approximate geographical location for the center of each county, in latitude and longitude, were provided along with the environmental type of the county and the approximate radius to cover the county lines. Along with this information, a list of frequencies to block along the adjacent region’s border was included. The actual assignment of frequencies is for four (4) channel-pairs per county.

## **5.3 Frequency Allocation Map**

Below is the data, or packing plan generated by APCO via the computerized packing program. The first section is channel assignment and then county by county information is provided. The plan took adjacent regions into consideration, in addition, letters of concurrence were sent. (ATTACHMENT 6)

## KENTUCKY COUNTY MAP

## **5.5 Allocation of Channels**

Based on adjacent regions channel assignments and the probability of adjacent channel interference within Region 17 the frequency-sorting program was not able to allocate any unassigned channels.

## **5.6 Assignment Statistics**

Maximum field strength for co-channel operation is 5Dbu

Maximum field strength for adjacent channel operation is 25Dbu

Total number of channels assigned 205

Total number of unassigned channels 24

Total number of reserved channels 0

## **5.7 Expansion of Initial Allocation**

In the event that the allocation for any county becomes depleted, the Region Review Committee shall meet to make further allocations to said county. Should this occur, the applying agency or entity shall submit the proper license a other licensing request. Allocations will be made based on the initial frequency allocation plan as mentioned above.

## **5.8 Application Process**

This section describes briefly the application process to assist any applicants. Application shall be submitted to the Kentucky APCO Frequency Advisor to be processed. The applications to be licensed in the 821-824/866-869 MHz frequency bands will be subject to review by the APCO Local Advisor. At his/her discretion the application will be submitted to the KRCRC if there is any discrepancies. The application can be rejected at the Regional level for non-conformance with this Plan. Items that should be included with the application at a minimum are service—what tasks or duties are the agency/applicant charged with accomplishing; system type—describe radio system (trunked, conventional, voice, data, voice/data combined, etc); intersystem interoperability—how the applying organizations will communicate or public safety entities will communicate; channel loading factors—equipment inventory totals that will be employed in the system and maximum number of mobile radios

potentially in use at a given time; coverage area—details of an engineering survey showing the radio coverage required for minimum coverage (40 DBU); vacated frequency returned—which frequencies the agency/ies will release for potential re-assignment; implementation schedule—an explanation of any budgetary commitment and a proposed time frame for putting equipment into service.

**5.9    Prioritization of Applicants**

A very simple method of prioritization has been chosen for use in this Region. In order to facilitate future problems, which may arise, the following rating system shall be used.

Prioritization shall be done according to a final score, based on applicant criteria. The highest score, in pints, shall be given priority in a situation where spectrum is insufficient to fulfill the needs of all.

|                                              |          |
|----------------------------------------------|----------|
| Public Safety Agencies.....                  | 2 Points |
| Public Services Agencies.....                | 1 Point  |
| Multi-agency Systems.....                    | 2 Points |
| Multi-agency/Multi Jurisdiction Systems..... | 3 Points |
| Single Agency/Jurisdiction Systems.....      | 1 Point  |

**5.10    Appeal Process**

At any time, any applicant may appeal an allocation, rejection, or any limits placed on a particular application for any reason. The appeal process has two levels; the Kentucky Region Conformance Review Committee, and the FCC. An applicant who decides to appeal a rejection should initiate that appeal immediately upon notification of rejection. In the event that an appeal reaches the FCC, their decision will be final and binding upon all parties.

## **6.0 THE REGION PLANNING COMMITTEE**

CHAIRPERSON: Jack Y. Sharp
